Office Action Summary	Application No. 09/759,711	Applicant(s) MODLIN, DOUGLAS N.	
	Examiner Jeffrey R. Snay	Art Unit 1743	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Supplemental Election/Restrictions

1. The following Office action imposes a further restriction to the group of claims previously elected by applicant on 04-26-04. The late identification of this further restriction requirement is regretted.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a first microplate, classified in class 422, subclass 102.
 - II. Claim 50, drawn to a second microplate, classified in class 422, subclass 102.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and different effects. Specifically, the microplate of invention I is characterized solely by providing sample wells with non-parallel inner and outer surfaces. The second microplate of invention II, however, is characterized solely by providing sample wells having a wall of non-uniform thickness such that an optimal angle of incidence and total internal reflection is provided. Whereas the non-parallel surfaces of invention I could perform a number of

Art Unit: 1743

effects such as selection of well volume or heat transfer characteristics, the structure of invention II is directed to provision of specific optical attributes. The effects and modes of operation in achieving those effects are thus patentably distinct.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper. Specifically, the specifically recited optical characteristics for invention II mandate a search in optical classifications, including class 356, which are not required for invention I.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
